DRINK UP AND REFILL WITH TAP FOR FREE

We've made it even easier to
stay hydrated on the go.

Look for the logo in cafes
and bars or download
the Refill app.

#RefillSuffolk

Single use plastic bottles take 450+ years to degrade and they often end up in our rivers and oceans causing harm to wildlife. As suppliers of clean, clear drinking water that tastes good Essex & Suffolk Water wants to make it easier than ever for everyone to opt for refillable bottles, rather than the disposable bottles.

Essex & Suffolk Water has partnered up with **City to Sea** to promote and encourage **free tap-water Refill stations** to be made available in cafes, bars and shops on every high street and transport hub across the UK, meaning that people are able to refill water bottles easily, for free, and on the move.

One of the ways you can help reduce plastic waste is to **download the free Refill app**. The app shows you where local business that have signed up as Refill stations are on a map, making it easy to find the nearest Refill stations to where you are, so you can fill your reusable water bottle on the go.

It's also really easy to **register your local café or restaurant** if they are not already signed up and it can all be done using the Refill app. Just make sure you ask the manager's permission first.

To register a business go to the blue circle on the map that shows your current location:

- 💧 Press and hold the location of the business - select 'create new' and then add the info! Info includes name, city, postcode, website, twitter account, details and a good photo/picture.
- 💧 Email refill@nwl.co.uk with the address and a sticker will be sent out to display in a suitable location.
- 💧 The City to Sea Refill team will then moderate before it goes live. This can take a few days.

If you are on Twitter it would be great if you could include #RefillSuffolk as well as tagging us @ESWH20 if you are tweeting about the scheme. Many thanks again for supporting this superb initiative to tackle plastic pollution.
