

THE WATER TRACKER SONG

Water that beautiful thing
The fountain of life from a well or a spring
Or the seas or rivers, it's everywhere
Do we appreciate it? Do we even care?

I hope so, everybody oughta
Become an expert protector of water
A tracker, a guardian, an action hero
Cause if we don't act, water levels will be zero

Small changes can make big waves
It's up to us now to save the day
Cause water is not just heaven sent
There's actually less than one percent

Of fresh and accessible water for us
So use it carefully no need to fuss
In the shower for an hour four minutes is plenty
Or else before you know it, the tap will be empty

I wanna be part of the solution (with the ripple effect)
Think of the water I can save (with the ripple effect)
Gonna be a water tracker hero (so come on)
So start that ripple effect - and let's all ride the wave

So now you wanna know what you can do
Start by getting a low flush loo
Bin the baths, get a good washing machine
And turn off the tap when brushing your teeth clean

Fill the dishwasher before you put it on
And there's no need to water your lawn
Each of these things seem little I know
But if we all do it more water can flow!

So now it's your time to step up and take action
Cause saving the planet will give you satisfaction
It's easy for anyone out there to do
Who can be a hero? I think it's you

So start today, bring your friends along
If you don't know where to start just sing this song
It's the ripple effect, there's a world to save
Let's make a great big wave

I wanna be part of the solution (with the ripple effect)
Think of the water I can save (with the ripple effect)
Gonna be a water tracker hero (so come on)
So start that ripple effect - and let's all ride the wave
